

## LAMPIRAN

### CARA MENJALANKAN PROGRAM

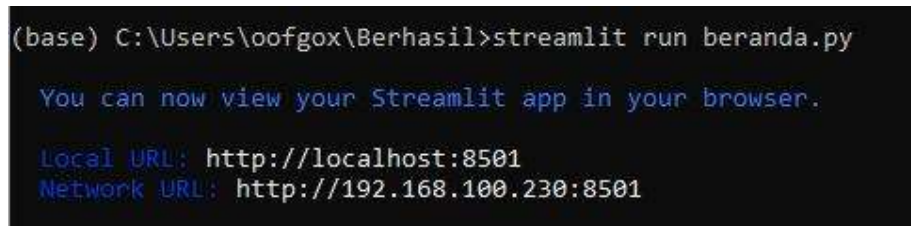

1. Buka *Anaconda Prompts*

A screenshot of an Anaconda Prompt terminal window. The title bar reads "Administrator: Anaconda Prompt (Anaconda3)". The terminal content shows the prompt "(base) C:\Users\oofgox>" on a black background with white text.

2. Masuk ke direktori tempat file aplikasi web berada

A screenshot of a terminal window showing the execution of the 'cd' command. The prompt is "(base) C:\Users\oofgox>cd Berhasil" and the next line shows the prompt has moved to "(base) C:\Users\oofgox\Berhasil>".

3. Jalankan aplikasi web menggunakan *library streamlit*

A screenshot of a terminal window showing the execution of the 'streamlit run' command. The prompt is "(base) C:\Users\oofgox\Berhasil>streamlit run beranda.py". The output shows a message: "You can now view your Streamlit app in your browser." followed by "Local URL: http://localhost:8501" and "Network URL: http://192.168.100.230:8501".

4. Browser akan otomatis terbuka dan aplikasi sudah berjalan
