Abstract *

The tourism potential in Banggai Islands is very qualified, but the lack of information media that can be a means of promotion results in low tourists. The purpose of this research is to overcome the problems that exist in the Banggai Islands by creating a website with one of the Content Management System (CMS), namely Wordpress. This research uses the waterfall method with stages consisting of, needs analysis, website design, system implementation, review, reporting. Black Box test as a means of testing in this study. This tourism promotion website focuses on providing information about tours in the Banggai Islands to make it easier for tourists to determine their tourist destinations. The results of this research are in the form of a tourism promotion website that can be used to facilitate tourist
