Table jasa_kirim

The screenshot shows the phpMyAdmin interface for the 'rozak' database. The left sidebar lists tables such as admin, alamat_kirim, bank, barang, detail_transaksi, ecurrency, harga_kirim, jasa_kirim, kategori, konfirmasi_pembayaran, kota, member, merk, transaksi, ukuran, and ukuran_barang. The current table being viewed is 'jasa_kirim'. The table structure is displayed with two columns: 'kd_jasa_kirim' (int(2)) and 'nama_jasa_kirim' (varchar(25)). The 'Information' tab is selected, showing Row Statistics: Data 44 B, Index 2 KB, Total 2 KB; Rows 2; Row length 22; Row size 1,046 B; Next autoindex 15; Creation Feb 05, 2015 at 09:16 AM; Last update Feb 05, 2015 at 09:16 AM.

Tabel kategori

The screenshot shows the phpMyAdmin interface for the 'rozak' database. The left sidebar lists tables including 'jasa_kirim' (which is currently selected). The table structure for 'kategori' is shown with five columns: 'kd_kategori' (int(3)), 'nama_kategori' (varchar(25)), 'alias_kategori' (varchar(25)), 'parent_kategori' (int(3)), and 'root_kategori' (varchar(30)). The 'Information' tab is selected, showing Row Statistics: Data 640 B, Index 2 KB, Total 2.6 KB; Rows 12; Row length 53; Row size 224 B; Next autoindex 53; Creation Feb 05, 2015 at 09:17 AM; Last update Feb 05, 2015 at 09:17 AM.
