

Cara Menjalankan Program

1. Install we server (Apache) dan sql server.
2. Buat database di sql server, lalu import database barang.sql.
3. Pindahkan file program ke directory root dari web server.
4. Hidupkan webserver Apache dan Mysql
5. Akses <http://127.0.0.1:8000/> dengan menggunakan browser.

Tampilan Menu Utama

The screenshot shows the Kaboel Craft application interface. On the left, there is a sidebar with the following menu items:

- Stock Barang
- Barang Masuk
- Barang Keluar
- Kelola Admin
- Logout

The main content area is titled "Stock Barang". It features two buttons: "Tambah Barang" (Add Item) and "Export Data". Below these buttons is a search bar with the placeholder "Search: []". There are also buttons for "Show" (dropdown menu set to 10), "entries", and "Search".

Below the search area is a table with the following data:

No	Gambar	Nama Barang	Deskripsi	Stock	Jenis	Aksi
1		telor garis 2	besar bulat	30	gentong	<button>Edit</button> <button>Delete</button>
